
Prototype evaluation template

Key user(s)

e.g., patient having a mammogram

Key questions/learnings needed

e.g., what design works best for patients and staff

Key weaknesses

e.g., falls open too easily, one size only, makes patients feel uncomfortable

Key usage scenario(s)

e.g., patient seated while waiting, patient having a mammogram

Key strengths

e.g., easy to launder, durable material

Ideas to improve prototype/criteria for next prototype

e.g., different sleeve design, better ties, more attractive to patients, helps retain patient dignity
